Therapies with Facetted Crystals and Induction

Förderkreis
der Esogetischen Medizin
nach Peter Mandel e.V.

The greatest care has been taken in the composition of this document with regard to the accuracy of the information contained herein.

Many of our therapeutic procedures and their effects are based exclusively on the empirical knowledge of naturopathy. Medical diagnoses and courses of treatment, especially treatment methods and their effects, are highly individual and different. For this reason, a successful treatment cannot be foreseen or guaranteed. As a precautionary measure, we therefore point out that we make this clear in the content we present with the help of the subjunctive. The word "may" therefore indicates, in the sense of an assumption or presumption, a mere possibility, the existence of which is uncertain and can be described as "perhaps" or "possibly". We therefore point out that, with regard to a possible success of treatment and the suitability of a therapy, these terms should not be understood in the sense of a promise of healing.

Please always keep in mind that certain diseases and strains are less or not suitable for self-treatment. We would like to expressly point out that before self-treatment with our products, especially in the home environment, it is advisable to consult your doctor or alternative practitioner. The author and publisher of this brochure are in no way liable for damages or consequences arising from the use of this brochure.

Dear Friends of Esogetic Medicine,

in the Esogetic Letter written in September 2023, I have dealt with the connection between crystal therapy and induction (also with the adapter). In my recent letters in December 2023 and March 2024, I have favored different topics. I would like to follow up on the September 2023 letter and show you more possibilities of therapy with the faceted crystals and induction.

Temporomandibular joint:

The indications of these zones refer to the fact that the person cannot let go and process. Night-time teeth grinding or the constant gnashing of teeth may be observed. In the causal chain there always are long-standing conflicts. One should also keep in mind the widespread disorders of the sleep rhythm.

Location:

The zones are located in front of the ear above the temporomandibular joint on the left and right.

Maxillary sinus:

In Esogetic Medicine, the maxillary sinuses are regarded as the center of cellular information. We find connections from here to the odontons, which in a negative scenario can lead to a focal toxicosis. Complaints in the joints of the pelvic region, and especially in the sacroiliac joints, are related to this. In Esogetic Medicine this reflex area is important for the entire lymph flow involving the head. Due to the supraordinate relationship to cellular consciousness all complaints and illnesses can also be tested at this location.

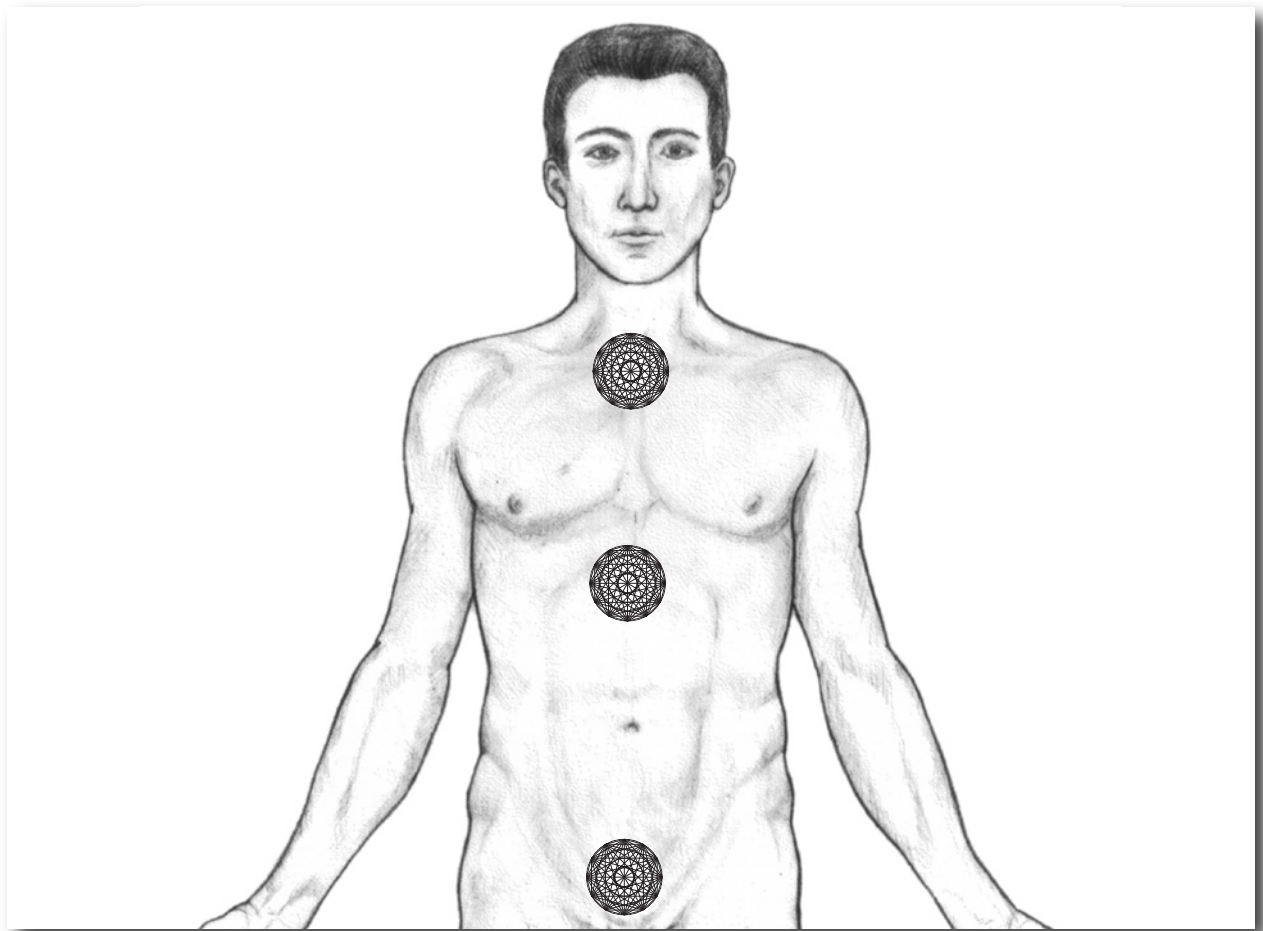

Location: The center of these zones is located at the edge of the zygomatic arch on a vertical line through the pupil of the eye as it is looking straight ahead.

Thanks to the adapter, we can now combine the zones of the maxillary sinus and the temporomandibular joint. We use the Point-Combi or Point-Gamma programs.

We have observed that this provides a better resolution of blocked lymphatic reactions.

At the same time we combine a treatment with the three Gray crystals in the areas shown below:

The three Sephiras Daath, Tepheret and Yesod lie on the "pillar of mercy" of the Sephiroth or the Tree of Life and are the most important stations in the Tree of Life after the three Sephiras of the creative triangle (Kether - Hohmah - Binah). They activate the flow of information from top to bottom. From Daath comes the knowledge (Pluto = abundance of the deep), in Tepheret (Sun = life force) this knowledge can become real and in Yesod (Moon = the lunar abilities) is recorded, what the person has made of the knowledge and the life force.

By combining the crystals and the Point-Combi or Point-Gamma programs via the temporo-mandibular joint and maxillary sinus at the same time, an opening occurs in the person. The clinging to things is softened, making it easier for the information of life to communicate itself and possibly become actualized.

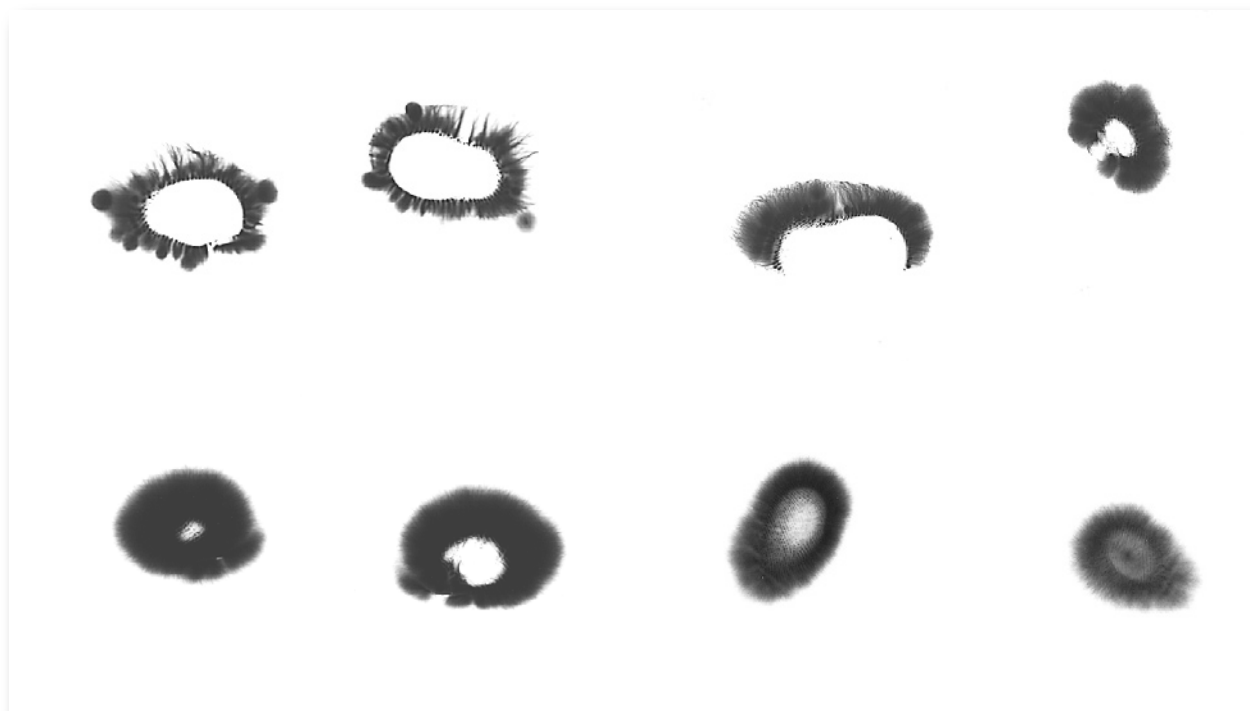

We are placing the three Gray crystals:

1. Tepheret center - 3 FW below the tip of the sternumDark Gray
2. Midpoint Daath - 3 FW below the upper edge of the sternumMedium Gray
3. Center Yesod - 3 FW above the pubic symphysisLight Gray

The crystals remain in position for 10 minutes during the program. Afterwards any additional treatment may be added.

This combination is also suitable for having the patient rest after a therapy, for instance after a treatment of the lymphatic system, if the phenomenology is appropriate.

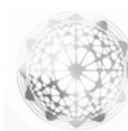

We see an involvement of the lymphatic system quite commonly. The familiar treatments are often sufficient to initiate a regulation. Sometimes, however, they are not. The emissions of the two thumbs can only be examples. If the phenomena are repeated in other EEA images, then the treatments described here are helpful.

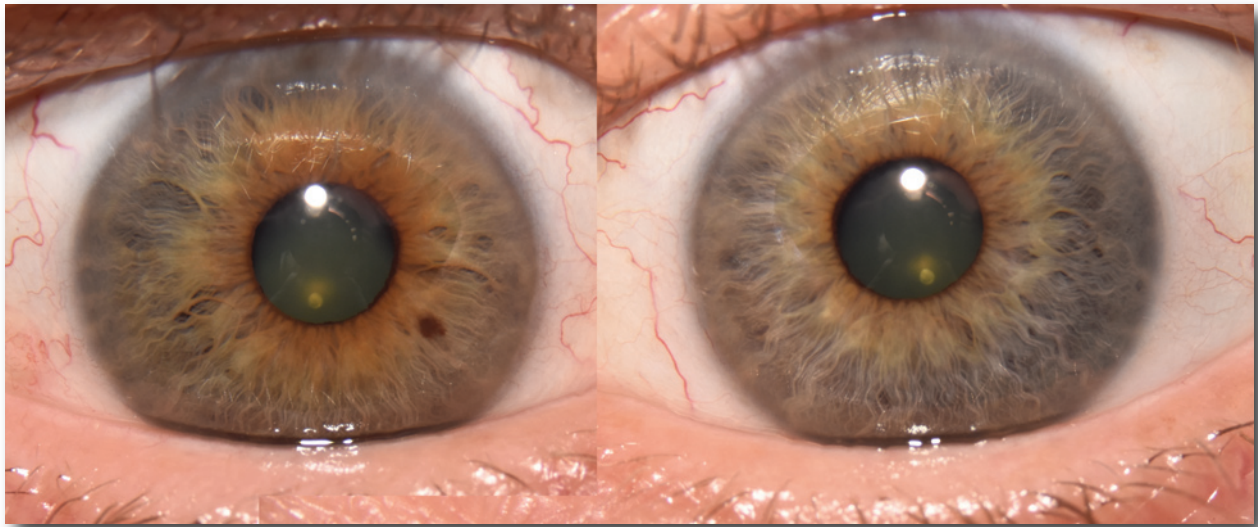

Many more examples could be given.

But it is not only the EEA that provides us with relevant information. The iris can also be an indicator in the event of severe stress. However, we cannot check this phenomenology as directly, as it is possible with the EEA.

Here is another example:

Auch hier ein Beispiel:

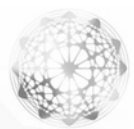

When looking at the iris, I pay particular attention to the vessels of the conjunctiva. They give me the indication that the attached organ area in the iris sheet is already experiencing stress. In this image, the vessels that indicate the lymphatic sector in the iris are important. Especially, if an area shows perifocal brightness, it indicates an activation there. In my experience, it may be assumed that disorders of the lymphatic system are already under way.

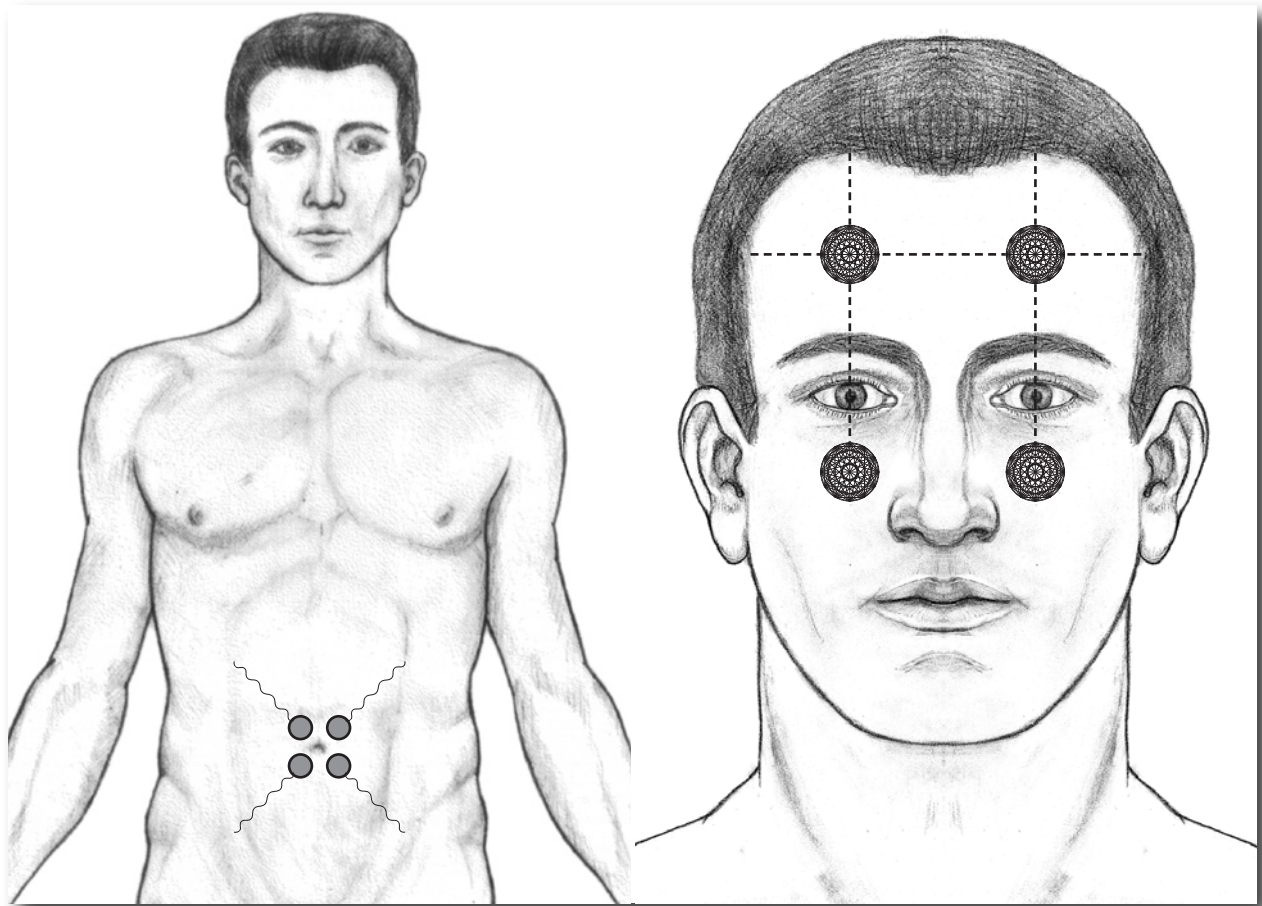

Let me return to the lymphatic principle.

It is now known that this principle plays a significant role in all diseases. In addition, this system is always imbalanced, when people are unable to cope with psychological stress (for instance anxiety). I also call the reactions of the lymphatic system the "psycho-lymphatic buffer reaction". As with all illnesses and stresses, the normal rhythms of life are altered, and therefore the waveforms and thus the information of the living system are disturbed. Through years of experience in regard to therapy utilizing the rhythms of the brain, we have been able to recognize that these rhythms are always altered in the case of illness. The idea of combining selective frequencies of the brain rhythms and applying them simultaneously has proven to be particularly effective.

In this context, I would like to give you another very effective treatment that is particularly suitable for patients, who have been suffering from serious illnesses for a very long time, like for instance rheumatism, focal toxicosis or other chronic illnesses. Experience has shown that the lymphatic system is certainly involved in these conditions.

The application of the adapter and simultaneously of the soul-spirit faceted crystals intensifies the treatment multiplied. So let's start by treating the known lymphatic reflex areas in the following order.

Step 1

The treatment begins by applying the four electrodes of the Synapsis 2 to the aggressive zones. At the same time, we place the soul-spirit faceted crystals on the positions:

1. Hypothalamus point on the leftCrimson
2. Right maxillary sinus pointLightgreen
3. Hypothalamus point on the rightTurquoise
4. Left maxillary sinus pointRose

When the crystals are in their positions, we switch on the Point-Combi program. This program runs for 10 minutes, and we shall leave the crystals in their positions for the entire duration.

Step 2:

After this part of the protocol, we will exchange the treatment media. Now we stick the electrodes on the positions of the head area and the crystals are placed on the aggressive zones.

1. Top leftCrimson
2. Bottom rightLightgreen
3. Top rightTurquoise
4. Bottom leftRose

Then we switch on the Point-Gamma program for 10 minutes.

Both Point programs do an excellent job, and any other indicated therapy options may be used afterwards.

There are currently so many options for treating the lymphatic system, especially in cases of established focal intoxication. I will certainly return to this topic in the next few letters.

Let us remember once again that the lymphatic system is the system of reaction. Of course in order to conduct a successful treatment, we will have to look for the reasons, why it is permanently reactive and thus creates blockages in the event of an illness. Together, however, we have a far greater chance of being able to help, even with serious illnesses.

Sincerely
